

Kite Festival

Introduction

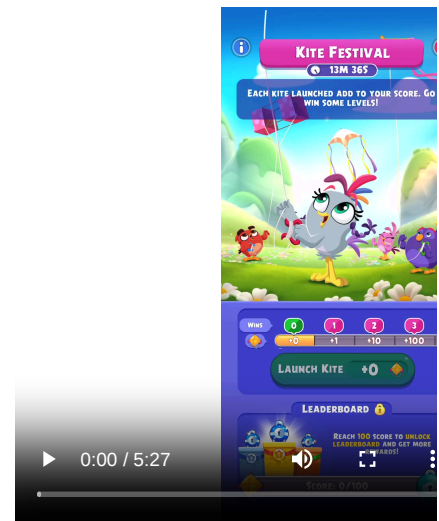

Kite Festival is a PVP event where players strive to submit the highest total score during the event.

Players accumulate scores by completing levels.

Consecutive wins grant additional scores, but a **single loss resets them**. As such, it requires players to balance the risks and rewards.

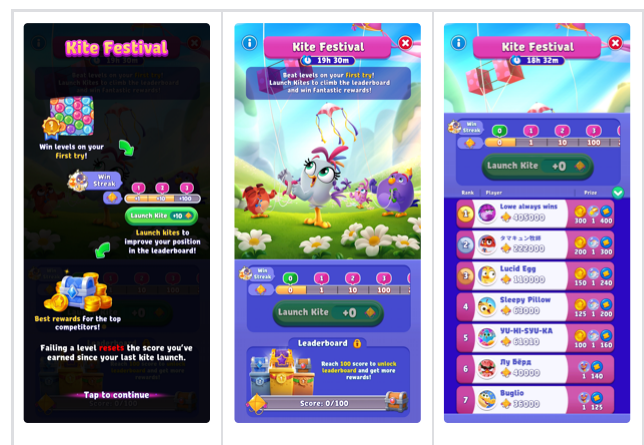

At any point, players may submit their collected score to secure a position on the Kite Festival leaderboard. Once submitted, the score resets, requiring players to rebuild momentum for further progression.

The leaderboard ranking is determined by the **total of all submitted scores**. At the end of the event, players will receive prizes according to their final ranking.
